An Equal Opportunity Employer

Indiana's non-seasonally adjusted unemployment rate for January is 5.5 percent, eight-tenths of a percentage point below the national rate of 6.3 percent, Craig E. Hartzler, Commissioner for the Indiana Department of Workforce Development, announced today. The number of Hoosiers employed during January 2002 was 2,923,000.

Indiana's January unemployment rate was lower than Illinois, 6.6 percent; Kentucky, 6.4 percent and Ohio at 5.7 percent.

"All sectors of Indiana's economy lost jobs in the month of January. Seasonal factors and the recession pushed Indiana's unemployment rate to

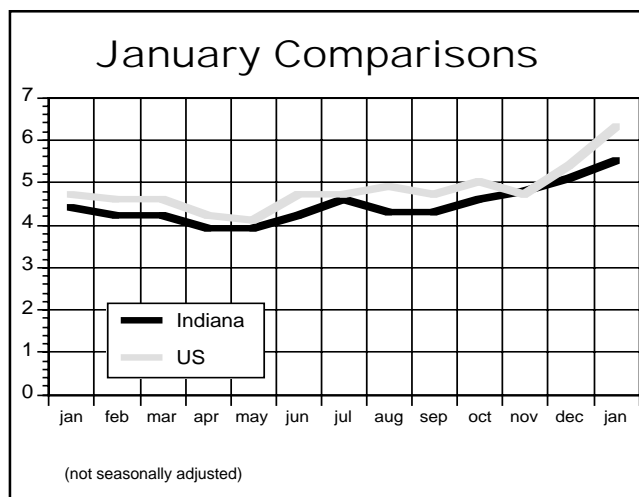

5.5%. We are especially concerned about the 15,041 Hoosiers who have exhausted their UI benefits during this difficult time," commented Hartzler.

The monthly survey of 7,500 Hoosier employers reports payroll employment at 2,857,400, a decrease of 39,400 from one year ago and 80,200 less than last month. Payroll employment is an estimate of non-agricultural jobs in Indiana businesses. It differs from labor force employment which is used in the calculation of the unemployment rate by not including the self-employed and agricultural workers. In addition, payroll employment includes all those who work in Indiana, while the unemployment rate is calculated by those who live in Indiana.

Manufacturing employment totals 617,000 in January, a decrease of 40,200 from last year. Motor vehicle manufacturing accounts for 89,800 jobs, 2,900 less than one year ago. Manufacturing of motor vehicle parts totals 59,900. Industrial machinery manufacturing in January accounts for 64,500 Hoosier jobs, 400 less than December.

Construction employment totals 130,200 a decrease of 12,600 from last month. Of that, heavy construction reports 12,900 jobs, an increase of 900 from last year.

Service producing employment totals 2,104,100 in January, 500 less than last year. Transportation and public utilities total 143,600, 2,200 less than December.

(over)

Retail trade totals 542,200, 2,500 less than a year ago. Of that, general merchandise stores report employment of 80,800, or 4,500 less than last year. Service sector employment, such as business services, computer and data processing, totals 733,600 in January, which is 4,000 more than the previous year.

Indiana's estimated labor force (the number of people 16 years of age and older who are able and available for work) totals 3,093,400 in January 2002. An estimated 2,923,000 Hoosiers are employed and 170,400 are unemployed.

Indiana's labor force for January 2001 totaled 3,052,800. Hoosiers employed one year ago is estimated at 2,918,300, and January 2001 unemployed in Indiana totaled 134,500. Indiana's estimated unemployment rate one year ago was 4.4 percent, compared with the national unemployment rate of 4.7 percent in January 2001.\*

\*Due to an expansion in the Current Population Survey (CPS), mandated by Congress, estimates for June 2001 (revised) and later at both the state and substate levels may not be fully comparable with those of earlier periods. In analyzing data, be aware that over-the-year comparisons, may differ slightly from comparisons that would have been made using data without the sample expansion. More detailed information can be found at <http://stats.bls.gov/launews1.htm>.
